---

To CTO:

I did as you instructed and logged into your eco account with firefox browser.

I got some gibberish about my javascript having to be enabled.

See attachment 01A Screen Shot to this e-mail.

My java script is enabled.

It says only advanced users should modify it.

So I hope I do not have to modify it just to use your website!

See attachment 01B Screen Shot to this e-mail.

How do I proceed to be able to use your eco website so I can apply for a copyright?

I never ever had this difficulty before when I used your eco website back in 2013.
