

Help improve Google search results

On some search results, you'll see an option to send feedback or suggest a translation. Your input helps us improve Google Search for everyone.

Below the search result, click **Feedback**. Then tell us:

- What you like or dislike about Google Search
- Things that are confusing or don't work
- Suggestions for making Google Search better

Be as specific as you can. More info helps us decide what to change. We won't reply to you directly, but we'll use the info you send to fix issues and improve search results.

Note: The feedback you give won't influence a page's ranking in results.
